

# Agenda Report

**To: KCFD 2 Commissioners**  
**From: Rich Elliott – Deputy Fire Chief**  
**Through: Chief Sinclair**  
**Regarding: Nighttime Transfers**

**Background:** Ellensburg Fire and subsequently KVFR has served as the ALS ambulance service for Kittitas County Hospital District One under a contract for services for over 50 years. This agreement allows KVFR to serve as the ALS service provider and sole ambulance service (excluding some specific contracts for mental health services) for over 1200 square miles in lower Kittitas County. These services supplement KVFR income at around 2 million dollars each year (GEMT plus transport revenue).

It should be noted that KVFR’s service model is relatively unique. Some fire departments do not transport, and most are not ambulance service providers. It is exceptional that a fire department will also do inter-facility transport work. These services are impactful to the community in terms of receiving very high-level service for a relatively low cost and KVFR is the beneficiary of significant revenue, supplemental staffing, and public support. The downside is that transfers, especially when not managed well, have a negative impact on 911 response and personnel.

**Proposal:** Local 1758 has proposed amending our long-standing policy and procedures regarding interfacility transfers from 2200 – 0400 to discontinue all transfers out of KVFR’s service area except:

- Unstable trauma patients
- STEMI (ST elevation myocardial infarction)
- Stroke patients

**Data:** 2019 and 2022’s interfacility transfer data was pulled from ERS (records management system). These two years were pulled as they represent a pre-COVID busy year (2019) and the most recent year. Transfers that originated before 2200 and after 0400 were excluded. The patient care narratives were read to determine if the patient would meet the Local’s criteria, whether the patient required ALS/BLS care and the general patient condition necessitating transfer.

The following are the results:

## 2019

126 transfers during period vs 652 total = 19.5%  
Meet 1758 criteria – 16  
BLS local (FYI) - 6  
ALNW – 1  
BLS – 21  
ALS – 82  
Average wait – 3 hr 42 minutes

## 2022

128 transfers during period vs 624 total = 20.5%  
Meet 1758 criteria – 9  
BLS local (FYI) – 34  
ALNW – 10  
BLS – 23  
ALS – 49  
Average wait – 3 hr 7 minutes

A significant number of the ALS transfers were for patients who were in need of timely care – cancer, respiratory, pediatric respiratory, GI Bleeds, ortho services, pulmonary embolism – see attached.

The most striking statistic is the fact that out of district transfers (those that would be delayed under the proposal) were reduced 30% during this time period from 103 to 72. Additionally, there are significant gaps 14+ day gaps in 2200-0400 transfers hinting that some of this may be due to specific providers.

**Analysis:** This proposal may have any number of impacts on the EMS system:

- Patient transport delays – up to 6 hours
- Loss of transfer beds – hospitals make dozens of requests over extended periods of time – when a bed is secured, it will likely not be held for hours. It will go to the next patient in the transfer portal.
- KCHD 1 has options. If our transfer services do not meet their needs, they can explore other service models. This is not currently happening, but the contract has a 30 day cancellation clause and the area outside KVFR (280 square miles) vs the hospital district (1200 square miles) would be KCHD 1's choice to provide EMS if they hired a different provider.
- Public perception – not transferring for up to 6 hours will likely cause the public to look at the system and why we are reducing services.
- Stacked resources demands after 0400 and rushed service request prior to 2200.
- Improved morale.

**Recommendation:** I believe we need to be very purposeful in our actions. Reducing service level (hours) is an option but one that, at the very least, causes significant delays in patient transfers. A significant reduction in revenue and possibly permanently changing our EMS system are also possible and not within our control. A work study that compares past to current staffing levels, actual time out of service and transfer impacts should be conducted to further evaluate options. Additionally, a financial impact that takes away transfers should be conducted so we understand the impacts of the hospital exercising their legal options.
